SUMMARY

Full-stack developer with corporate IT experience and end-to-end web projects, from the database to the front end. As an IT Analyst, I supported the TOTVS WinThor ERP and built internal applications with React and Node.js on top of Oracle and MySQL databases. In my own projects I work with Next.js, TypeScript and Supabase, with a focus on security and automated testing (Jest, Playwright and CI with GitHub Actions). Completed a 1,500-hour full-stack program at Trybe; B.S. in Computer Engineering in progress at the Federal University of Ceará (UFC).

EXPERIENCE

IT Analyst — Distribuidora Donizete (distribution company)

Apr 2025 – Jul 2026

- Supported and maintained the TOTVS WinThor ERP, keeping operations, logistics and finance processes running.
- Built and maintained internal applications with React and Node.js, connecting ERP data to company-specific business rules.
- Wrote and optimized complex SQL queries in Oracle and MySQL for management reports and decision-making.
- Diagnosed and fixed issues in legacy and new systems, reducing operational downtime in critical situations.
- Automated repetitive manual tasks with scripts, cutting rework and data-processing errors.

IT and Networking Intern — Rações Golfinho

Jul 2021 – Jan 2022

- Provided Level 1 help desk support to employees, solving hardware and software issues.
- Maintained and expanded the local network: structured cabling (UTP), rack organization and connectivity troubleshooting.
- Prepared and configured new workstations (Windows installation, software and network integration).
- Managed user accounts and access permissions, and documented technical procedures.

PROJECTS

MyFinPocket — Personal finance app (PWA)

[repository](#) · [live](#)

Next.js, TypeScript, Supabase, Tailwind CSS, shadcn/ui, Zod, Jest, Playwright, GitHub Actions

- Installable web app to track income and expenses, with monthly dashboard, budgets, savings goals and PDF reports.
- Supabase back end with Row Level Security (RLS), Next.js Server Actions, Zod validation and middleware-protected routes.
- AI features with Google Gemini: reads receipt photos to fill in transactions and summarizes monthly spending.
- Hardened a batch payment endpoint to require authentication, verify record ownership and compute totals on the server.
- Unit tests with Jest and end-to-end tests with Playwright, running on GitHub Actions on every push.

Bemobile — Front-end technical challenge

[repository](#)

React, Styled-Components, Vite, json-server

- Responsive employee table with real-time search and filtering.
- Custom accordion component built without external libraries for mobile layouts.

TECHNICAL SKILLS

Front end: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Redux, Tailwind CSS, Angular.js, Bootstrap

Back end: Node.js, PHP, Laravel, REST APIs, Zod

Databases: Oracle, MySQL (modeling, advanced queries and optimization), PostgreSQL/Supabase

Testing: Jest, Playwright (E2E)

DevOps and tools: Git, GitHub, GitHub Actions (CI), Docker (basic)

Systems: TOTVS WinThor (ERP), Windows and Linux administration

Languages: Portuguese (native), English (intermediate/advanced)

EDUCATION

B.S. in Computer Engineering — Federal University of Ceará (UFC)

2019 – Dec 2027 (expected)

Full-Stack Web Development (1,500 hours) — Trybe

2020 – 2021
